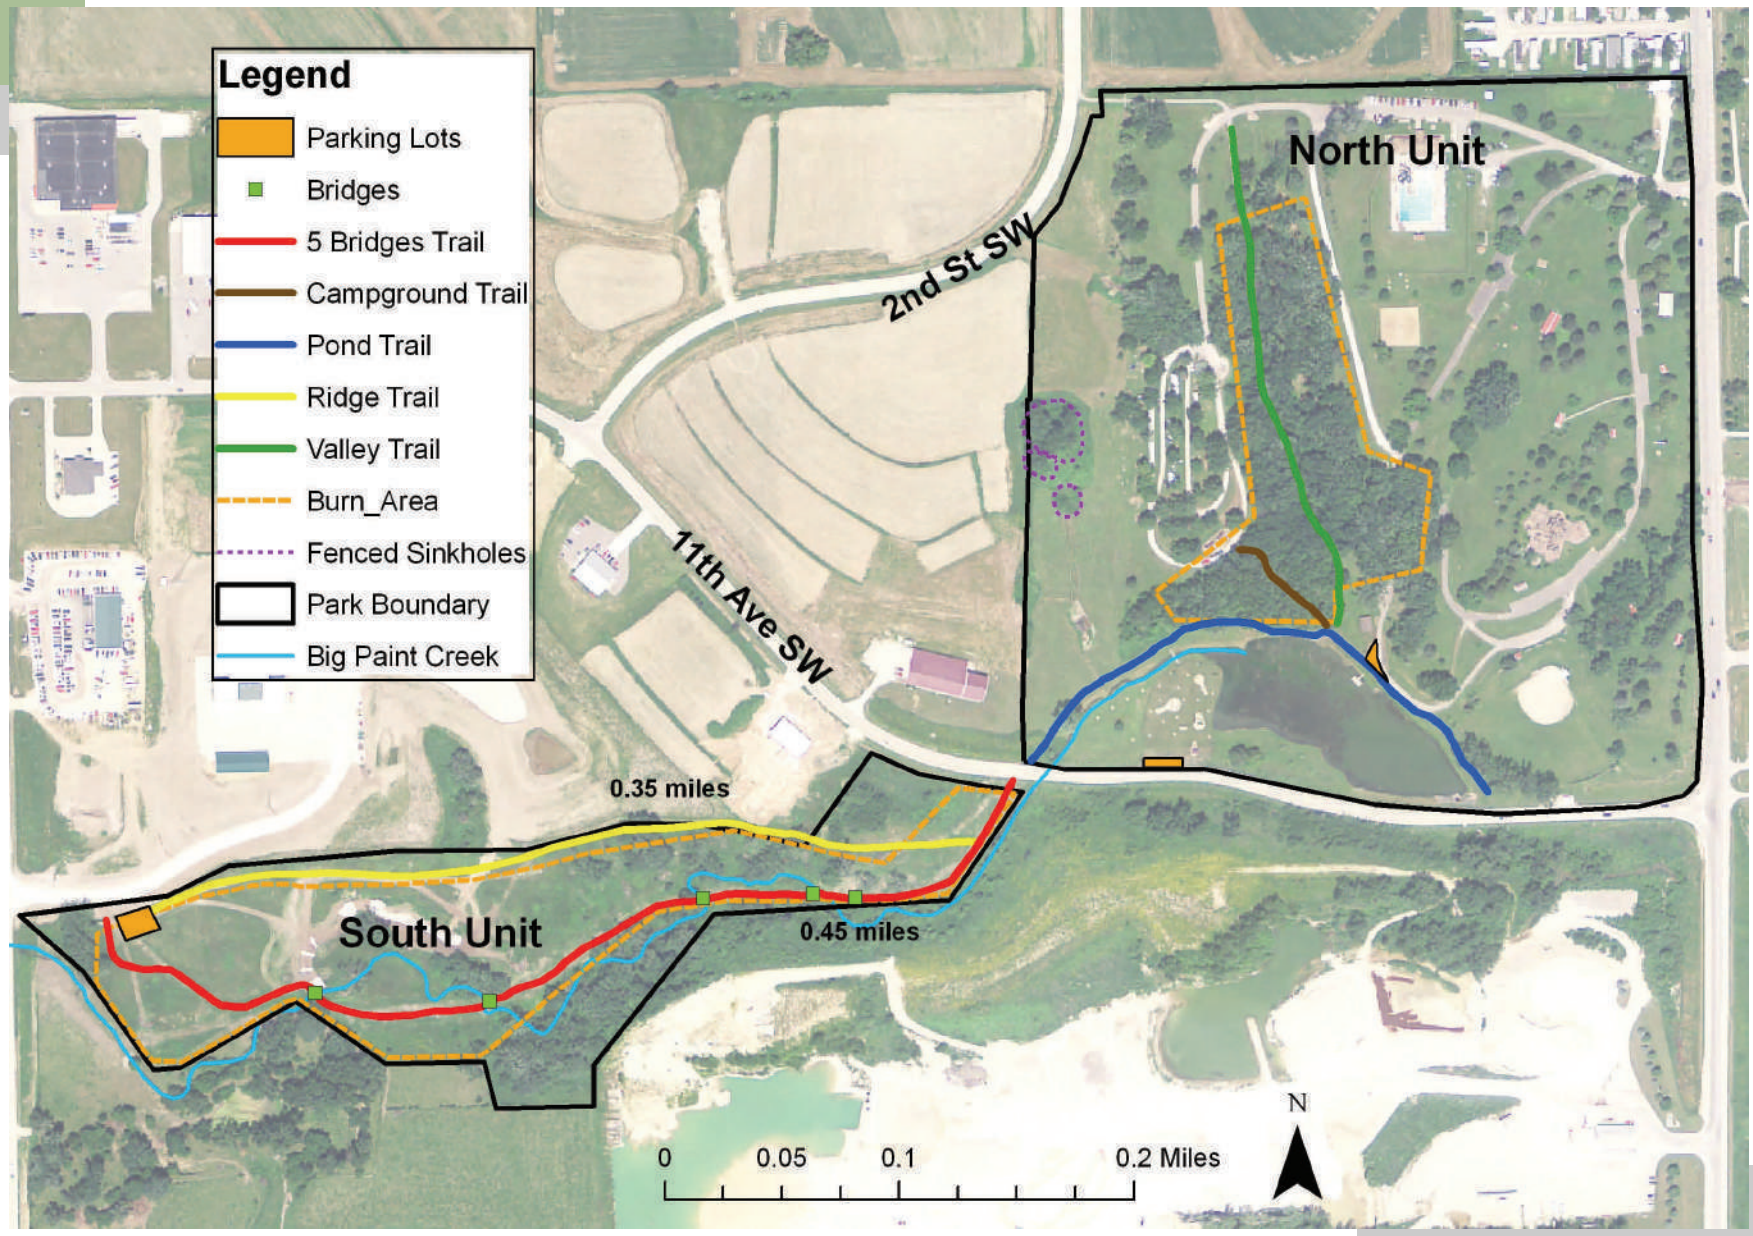
The Trail


The park is now divided into the north unit (existing park) and south unit (new park addition). The trail north of 11th Ave SW is asphalt and matches up with the existing trail on the north side of the pond. The trail in the south unit has a rock base with a limestone screening top. These trail additions total nearly a mile of new trail. In the south unit, the trail creates a loop from 11th Ave SW to the new gravel parking lot on the western end and back.
